

Lead Consumer Notice Certification Form

All water systems that conduct lead monitoring must provide individual sampling results to the persons at each sample location (40 CFR 141.85(d)(3)).

Notification of Results: The water system must provide a consumer notice as soon as possible, but no later than 30 days after receiving the result.

Community water systems: You must provide individual sampling results to all residences for which you received lead samples. In multi-unit structures, only notify each unit tested.

Nontransient-noncommunity water systems (NTNCs): You must notify all consumers who use water from the sample tap, even if they do not receive a water bill. If sampling is conducted at sites you have indoor access to, sampling results can be posted in public areas.

Certification to EPA: *EPA must receive a sample copy of one consumer notice and a signed certification form* (below) **no later than 90 days after the end of the monitoring period.**

To meet the consumer notification requirement, you may:

- Use the EPA Consumer Notice template.
- Prepare your own Consumer Notice in conjunction with EPA.

If you choose to produce your own Consumer Notice, it must include the following:

1. The sample results of the tap tested.
2. An explanation of the health effects of lead.
3. Steps consumers can take to reduce exposure to lead in drinking water.
4. The water system's contact information.
5. The maximum contaminant level goal (MCLG) and action level for lead, and the definitions of each.

Lead Results: Consumer Notification Certification Form

Please complete this section. The signature below certifies that the notice contains all required elements.

Complete the following items (check all that apply):

☒ I mailed/delivered all Consumer Notices to the water users at all of the lead sampling locations within 30 days of receiving the lead results from the laboratory.

☐ (For NTNC water systems ONLY) Notices were posted at _____ on ____ / ____ / ____ within 30 days of receiving the lead results from the laboratory.
